

## Linear 100 **Surface Mount** Installation Instructions

### Step 1

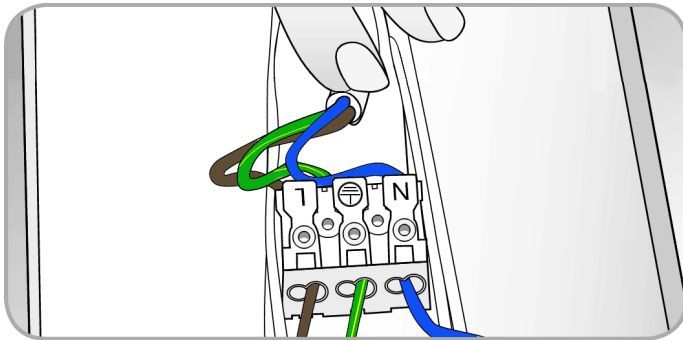

Remove cover plate assembly by sliding inner diffuser to one side, to reveal screw. Repeat opposite end.

### Step 2

Secure fitting to ceiling via 2 x 6mm mounting holes along centre of the fitting.

### Step 3

Wire in power to terminal block on fitting.

### Step 4

Screw cover plate assembly back on. Keep wires tucked away.

### Step 5

#### LO Diffuser

Place diffuser smooth side into light fitting facing LED's by pushing up one end on an angle and sitting it between the retaining flanges.

#### XLG Diffuser

Fit frosted diffuser (Lumieo) first, with polished side facing the LED's by pushing in one corner at a time until it sits flush in fitting. Repeat process with second diffuser (CDP). Smooth side facing in.
